PREFACE

Bureau of Indian Standards (BIS) is the National Standards Body of India, responsible for establishing standards for products to ensure quality, safety, and efficiency.

This compendium aims at providing an overview of Indian Standards on safety of household appliances, offering insights into their safety and testing requirements. It is intended for use by common consumers, manufacturers, construction professionals, engineers, quality control personnel, academic professionals, and regulatory authorities to enhance understanding and compliance with industry standards.

By compiling relevant standards on safety of household appliances in a single document, this compendium serves as a ready reference for professionals involved in production of household appliances, and safety assessment, contributing to improved construction safety.

INTRODUCTION

Electrotechnical Department(ETD) of BIS is responsible for formulating Indian Standards related to electrotechnology. Electrical Appliances Sectional Committee, ETD 32 is responsible for the formulation of Indian standards for household and similar appliances.

A key standard under ETD 32 is IS 302 series, which defines safety requirements for household and similar electrical appliances. These series of standards ensure that electrical appliances are safe to use, reliable, and durable under normal operation.

The standard IS 302 is divided into multiple parts: Part 1 covers general safety requirements applicable to all appliances, while Part 2 includes specific safety requirements for different types of appliances, such as irons, refrigerators, kitchen machines, and fans etc.

Similarly, Mechanical Engineering Department (MED) of BIS formulates Indian Standards for varied products including household products. Refrigeration and Air Conditioning Sectional Committee, MED 03 formulates standards for refrigeration and air conditioning products. While Domestic and Commercial Gas Burning Appliances Sectional Committee, MED 23 formulates standards for domestic and commercial gas burning appliances (pressure type) such as gas stoves, oven, cooking ranges and water heaters, including gobar gas stoves.

The list of standards related to safety of household appliances, published by BIS under these Sectional Committees (ETD 32, MED 03 and MED 23) and their short description is given as follows:

IS 302 (Part 1) : 2024 Household and similar electrical appliances safety Part 1 General requirements (*Seventh Revision*)

This represents the latest revision of the general safety requirements standard for household and similar electrical appliances. Like its predecessor, it covers fundamental safety aspects applicable broadly. Its applicability spans numerous appliance types, and its advantage lies in providing updated, comprehensive baseline safety criteria for manufacturers and regulators.

IS 302 (Part 2/Sec 2) : 1997 Safety of household and similar electrical appliances Part 2 Particular requirements Sec 2 Vacuum cleaners and water suction cleaning appliances

This standard specifies the safety requirements for vacuum cleaners and water suction cleaning appliances, building upon the general requirements in Part 1. It is applicable to these particular types of cleaning appliances. Its purpose is to address safety concerns unique to the design and operation of vacuum and water suction cleaners.

IS 302 (Part 2/Sec 3) : 2024 Household and similar electrical appliances safety Part 2 Particular requirements Sec 3 Electric irons (*Second Revision*)

This is the second revision of the standard for the safety of electric irons. It provides updated and specific safety requirements for these appliances. Its applicability is limited to electric irons, and its advantage lies in enhancing safety by reflecting current best practices and addressing potential risks associated with electric irons.

IS 302 (Part 2/Sec 4) Safety of household and similar electrical appliances Part 2 Particular requirements Sec 4 Spin extractors

This standard focuses on the specific safety requirements for spin extractors, which are used in laundry. It is applicable to spin extractors, outlining necessary safety measures. Adhering to this standard ensures the safe operation of spin extractors, mitigating risks related to high-speed rotation and electrical components.

IS 302 (Part 2/Sec 6) : 2009 Safety of household and similar electrical appliances Part 2 Particular requirements Sec 6 Cooking ranges, hobs, ovens and similar appliances (First Revision)

This standard provides particular safety requirements for electric cooking ranges, hobs, ovens, and similar appliances. It applies specifically to these types of electric cooking devices. Its primary advantage is ensuring safety in cooking appliances, which often involve high temperatures and electrical loads, by specifying design and performance criteria.

IS 302 (Part 2/Sec 7) : 2024 Safety of household and similar electrical appliances Part 2 Particular requirements Sec 7 Domestic electric clothes washing machines

This is an updated version of the standard for domestic electric clothes washing machines. It provides the latest specific safety requirements for these appliances. Applicable to household washing machines, this revision aims to improve safety standards in line with current technology and international practices.

IS 302 (Part 2/Sec 8) : 2024 Household and similar electrical appliances safety Part 2 Particular requirements Sec 8 Shavers, hair clippers and similar appliances (First Revision)

This standard is the first revision of the safety requirements for shavers, hair clippers, and similar appliances. It provides updated safety criteria specifically for these devices. Its applicability is focused on personal grooming appliances, and its advantage is providing current safety specifications for the design and manufacture of these products.

IS 302 (Part 2/Sec 9) : 2009 Safety of household and similar electrical appliances Part 2 Particular requirements Sec 9 Toasters, grills, roasters and similar appliances (First Revision)

This standard outline specific safety requirements for toasters, grills, roasters, and similar appliances used for cooking or heating food. It applies to these types of heating appliances. Compliance with this standard helps ensure these appliances operate safely, addressing risks associated with heat and electricity.

IS 302 (Part 2/Sec 11) : 1994 Safety of household and similar electrical appliances Part 2 Particular requirements Sec 11 Tumbler dryers

This standard specifies the particular safety requirements for electric tumbler dryers used for drying clothes. It is applicable specifically to tumbler dryers. The standard's advantage is ensuring the safe operation of these appliances, considering hazards like heat, mechanical parts, and electrical safety.

IS 302 (Part 2/Sec 12) : 1993 Safety of household and similar electrical appliances - Specification Part 2 Particular requirements Sec 12 Warming plates and similar appliances

This standard details specific safety requirements for warming plates and similar appliances designed to keep food or plates warm. It applies to these heating appliances. The standard aims to ensure safe operation, addressing risks related to surface temperatures and electrical safety for devices that are often left on for extended periods.

IS 302 (Part 2/Sec 13) : 2024 Household and similar electrical appliances safety Part 2 Particular requirements Sec 13 Deep fat fryers, frying pans and similar appliances (*First Revision*)

This is the first revision of the safety standard for deep fat fryers, frying pans, and similar appliances. It provides updated particular safety requirements for these cooking devices. Applicable to this category of appliances, the revision incorporates current safety practices to address the specific hazards associated with deep frying and high-temperature cooking.

IS 302 (Part 2/Sec 14) : 2009 Safety of household and similar electrical appliances Part 2 Particular requirements Sec 14 Electric kitchen machines (*First Revision*)

This standard specifies particular safety requirements for electric kitchen machines, which include a variety of appliances like mixers, blenders, food processors, etc. It is applicable to electric kitchen machines. Adhering to this standard ensures the safe design and operation of complex kitchen equipment, addressing electrical and mechanical safety.

IS 302 (Part 2/Sec 15) : 2009 Safety of household and similar electrical appliances Part 2 Particular requirements Sec 15 Appliances for heating liquids (*First Revision*)

This standard outline specific safety requirements for appliances used for heating liquids, such as electric kettles and other liquid heaters. It applies to these types of appliances. The standard's purpose is to ensure safety when heating water and other liquids electrically, addressing risks like boiling water, steam, and electrical faults.

IS 302 (Part 2/Sec 21) : 2024 Household and similar electrical appliances safety Part 2 Particular requirements Sec 21 Storage water heaters

This is an updated version of the safety standard for stationary storage water heaters. It provides the latest particular safety requirements for these appliances. Applicable to storage water heaters, this revision incorporates updated safety measures to address potential electrical, thermal, and pressure-related hazards.

IS 302 (Part 2/Sec 23) : 2009 Safety of household and similar electrical appliances Part 2 Particular requirements Sec 23 Appliances for skin or hair care (*First Revision*)

This standard specifies particular safety requirements for appliances used for skin or hair care, such as hair dryers, straighteners, curling irons, etc. It applies to these personal grooming appliances. The standard's advantage is ensuring the safe design and use of devices that involve heat and electricity in close proximity to the body.

IS 302 (Part 2/Sec 24) : 1994 Safety of household and similar electrical appliances Part 2 Particular requirements Sec 24 Refrigerators, food - freezers and ice - Makers

This standard specifies safety requirements for household and similar-use refrigerators, freezers, and their combinations, including those used in camping, caravans, and leisure boats. It focuses on safety aspects, excluding construction and operational features, to ensure safe usage across various applications.

IS 302 (Part 2/Sec 25) : 2014 Safety of household and similar electrical appliances Part 2 Particular requirements Sec 25 Microwave ovens

This standard outlines specific safety requirements for microwave ovens. It is applicable to microwave ovens used for household purposes. Adhering to this standard is crucial for ensuring the safe operation of microwave ovens, addressing risks related to microwave radiation, heat, and electrical safety.

IS 302 (Part 2/Sec 26) : 2014 Safety of household and similar electrical appliances Part 2 Particular requirements Sec 26 Clocks (*First Revision*)

This standard details particular safety requirements for mains-operated clocks. It applies to electric clocks powered from the mains supply. The standard ensures that these relatively low-power appliances still meet necessary electrical safety criteria to prevent hazards.

IS 302 (Part 2/Sec 30) : 2007 Safety of household and similar electrical appliances Part 2 Particular requirements Sec 30 Room heaters (*First Revision*)

This standard specifies particular safety requirements for electric room heaters. It applies to various types of room heaters used in households. The standard aims to ensure the safe operation of heating appliances, which involve significant heat generation and electrical loads, addressing risks of fire, burns, and electrical hazards.

**IS 302 (Part 2/Sec 31) : 2009 Safety of household and similar electrical appliances Part 2
Particular requirements Sec 31 Range hoods**

This standard outlines specific safety requirements for electric range hoods (cooker hoods). It is applicable to range hoods installed above cooking appliances. The standard ensures the safe integration and operation of these ventilation appliances, addressing electrical safety and mechanical safety related to fans and filters.

**IS 302 (Part 2/Sec 32) : 1994 Safety of household and similar electrical appliances Part 2
Particular requirements Sec 32 Massage appliances**

This standard sets forth particular safety requirements for electric massage appliances. It applies to devices designed for personal massage using electrical power. The standard ensures the safe design and use of these appliances, considering their direct contact with the body and electrical operation.

**IS 302 (Part 2/Sec 35) : 2017 Safety of household and similar electrical appliances Part 2
Particular requirements Sec 35 Electric instantaneous water heaters (*Second Revision*)**

This standard details specific safety requirements for electric instantaneous (tankless) water heaters. It is applicable to water heaters that heat water on demand. The standard focuses on ensuring safety in these high-power appliances, addressing electrical safety and thermal hazards effectively.

**IS 302 (Part 2/Sec 42) : 2024 Household and similar electrical appliances – particular
requirements Sec 42 Commercial electric forced convection ovens, steam cookers and
steam-convection ovens**

This standard provides particular safety requirements for commercial electric forced convection ovens, steam cookers, and steam-convection ovens. While listed in the household series, its applicability is specified for commercial use. The standard ensures safety in heavy-duty cooking appliances used in commercial settings.

**IS 302 (Part 2/Sec 45) : 1994 Safety of household and similar electrical appliances Part 2
Particular requirements Sec 45 Electric heating tools**

This standard outlines specific safety requirements for electric heating tools, which might include soldering irons and similar devices. It applies to these handheld tools that generate heat electrically. The standard aims to ensure safe operation, addressing risks of burns and electrical shock associated with heated tools.

IS 302 (Part 2/Sec 46) : 1993 Safety of household and similar electrical appliances Part 2 Particular requirements Sec 46 Electric steam cookers

This standard specifies particular safety requirements for electric steam cookers. It is applicable to appliances that cook food using steam generated electrically. The standard ensures safety in using steam under pressure and electrical components, mitigating risks associated with heat and electricity.

IS 302 (Part 2/Sec 59) : 2024 Household and similar electrical appliances safety Part 2 Particular requirements Sec 59 Insect killers (*First Revision*)

This is the first revision of the safety standard for electric insect killers. It provides updated particular safety requirements for these devices. Applicable to insect killers, the revision incorporates current safety measures to ensure safe operation despite the use of high voltage.

IS 302 (Part 2/Sec 74) : 2024 Household and similar electrical appliances safety Part 2 Particular requirements Sec 74 Portable immersion heaters

This standard specifies particular safety requirements for portable immersion heaters. It is applicable to devices used for heating liquids by direct immersion. The standard is critical for ensuring safety with these appliances, which involve direct contact with liquids and high electrical loads, addressing risks of electric shock and fire.

IS 302 (Part 2/Sec 75) : 2018 Safety of household and similar electrical appliances Part 2 Particular requirements Sec 75 Commercial dispensing appliances and vending machines

This standard outlines specific safety requirements for commercial dispensing appliances and vending machines. While part of the household series, its applicability is specified for commercial use. The standard ensures safety in complex electrical machines used for dispensing goods or services in public or commercial areas.

IS 302 (Part 2/Sec 76) : 1999 Safety of household and similar electrical appliances Part 2 Particular requirements Sec 76 Electric fence energizers

This standard specifies particular safety requirements for electric fence energizers. It applies to devices used to power electric fences. The standard addresses the unique safety concerns associated with producing high-voltage pulses for electric fences.

IS 302 (Part 2/Sec 80) : 2017 Household and similar electrical appliances – Safety Part 2-80 Particular requirements for fans (*First Revision*)

This standard specifies particular safety requirements specifically for electric fans. It is applicable to various types of household and similar fans. The standard aims to ensure the safe design and operation of fans, addressing electrical safety and mechanical hazards related to fan blades and housing.

IS 302 (Part 2/Sec 201) : 2008 Safety of household and similar electrical appliances Part 2 Particular requirements Sec 201 Electric immersion water heaters (*First Revision*)

This standard outlines specific safety requirements for electric immersion water heaters. It applies to devices used to heat liquids by immersing the heating element. The standard is essential for ensuring safety, mitigating risks like electric shock and fire associated with immersion in liquids while energized.

IS 302 (Part 2/Sec 202) : 1992 Safety of household and similar electrical appliances Part 2 Particular requirements Sec 202 Electric stoves

This standard details specific safety requirements for electric stoves. It is applicable to electric stoves used for cooking. The standard ensures safety in the use of high-temperature surfaces and electrical heating elements, addressing potential hazards in the kitchen environment.

IS 302 (Part 2/Sec 203) : 1994 Safety of household and similar electrical appliances Part 2 Particular requirements Sec 203 Electric call bells and buzzers for indoor use

This standard specifies particular safety requirements for electric call bells and buzzers intended for indoor use. It applies to these signaling devices. The standard ensures the electrical safety of bells and buzzers installed within buildings.

IS 302 (Part 2/Sec 204) : 1994 Safety of household and similar electrical appliances Part 2 Particular requirements Sec 204 Electric water boilers

This standard outlines specific safety requirements for electric water boilers. It is applicable to appliances designed to boil water electrically. The standard addresses safety concerns related to boiling water, steam, and electrical components to prevent burns and electric shock.

IS 302 (Part 2/Sec 206) : 1994 Safety of household and similar electrical appliances Part 2 Particular requirements Sec 206 Electric coffee makers

This standard details particular safety requirements for electric coffee makers. It applies to appliances used for brewing coffee using electrical heating elements. The standard ensures safety in handling hot liquids and electrical components in the process of making coffee.

IS 302 (Part 2/Sec 208) : 1994 Safety of household and similar electrical appliances Part 2 Particular requirements Sec 208 Single walled baking ovens

This standard specifies particular safety requirements for single-walled electric baking ovens. It is applicable to these specific types of ovens. The standard addresses safety concerns related to high temperatures and electrical heating elements in baking ovens.

IS 302 (Part 2/Sec 209) : 1994 Safety of household and similar electrical appliances Part 2 Particular requirements Sec 209 Low speed food grinding machines

This standard outlines specific safety requirements for low-speed electric food grinding machines. It applies to appliances used for grinding food at low speeds using electrical power. The standard ensures safety in the operation of these machines, addressing electrical and mechanical hazards related to grinding mechanisms.

IS 16678 (Part 1 to 4)/ISO 5149-(1 to 4) Refrigerating systems and heat pumps - safety and environmental requirements

This standard series (Parts 1 to 4) defines safety requirements for the operation, maintenance, and repair of refrigerating systems and heat pumps including household appliances. It promotes safe practices, environmental protection, and system reliability through standardized procedures including refrigerant recovery.

IS/IEC 60335-2-40 : 2018 Household and similar electrical appliances safety Particular requirements for electrical heat pumps air-conditioners and dehumidifiers

This standard specifies safety requirements for electric heat pumps, air conditioners, dehumidifiers, and fan coil units, which use flammable refrigerants. It addresses related hazards to enhance safety and support the use of alternative refrigerants (which have lower Ozone depletion potential and lower global warming potential) in HVAC systems.

IS 12011 : 2022 Code of safety practice for domestic LPG Installation (*First Revision*)

This standard defines general safety requirements for the installation and operation of domestic appliances fueled by LPG in cylinders. It applies to the safe use and handling of LPG cylinders, helping to prevent accidents, ensure proper usage, and promote safe practices in residential settings.

IS/ISO 22702 : 2018 Utility lighters - Safety specifications (*First Revision*)

This standard defines safety requirements for utility lighters used in typical and foreseeable conditions. It covers products like grill and fireplace lighters, excluding those for cigars, pipes, or cigarettes, to reduce accident risks and ensure safe consumer use.

IS/ISO 9994 : 2018 Lighters - Safety specifications (*First Revision*)

This standard specifies safety requirements for lighters to ensure protection during normal use and foreseeable misuse. It applies to flame-producing products such as cigarette, cigar, and pipe lighters. By setting safety benchmarks, it helps minimize accident risks and promotes safer usage by consumers.
