1.0.Integrated Audit:

- Audit of an organization's Management System against two or more sets of audit standards conducted at same time is called integrated audit.
- Documentation could be sharing of document for common criteria or combining separate system documentation.

Note:

There is no IMS International Standard, so integrated audit can be a joint audit or a combined audit.

2.0.Audit Time:

- Calculate audit time requirement as per time norms or using software module of BIS for each standard. Add up all time calculated for each of the standard.
- This audit time can be reduced by 20 per cent, when auditors are competent in more than one system and client is able to respond to multiple systems at a time.
- Audit time may be increased suitably for high complexity or when location of sites are wide spread.

2.1. Audit Team:

- Team Leader shall be competent in at least one of the audit standards. Audit team as a whole to satisfy competence requirements. At least one expert to cover the expertise of the scope shall be available to ensure the competence of team.

3.0. Audit Planning:

Stage-I audit shall invariably indicate the level of integration of documents, elements of standards and responsibilities.

Audit shall be planned considering the stage-I audit. Audit Plan shall be prepared in such a manner that all the activities under the scope are covered and Auditor Competent in particular system(s) are carrying out the audit for that system(s).

Proper justice shall be made while allotting time to an activity by an Auditor Competent in individual management system.
